**Discrete Mathematics**
**Volume 238, Numbers 1–3, 28 July 2001**

## Contents

**Preface**

*C.J. Colbourn and H. Shen* 1

**Contributions**

*A.M. Assaf, N. Shalaby and J. Yin*
Directed packing and covering designs with block size four 3

*M. Buratti and F. Zuanni*
Some observations on three classical BIBD constructions 19

*W. Chen and T. Kløve*
Weight hierarchies of binary linear codes of dimension 4 27

*J. Eisfeld, L. Storme, T. Szőnyi and P. Sziklai*
Covers and blocking sets of classical generalized quadrangles 35

*S. Gao and H. You*
Vanishing conditions on parameters for $P(Q)$-polynomial association schemes 53

*D. Held and M.-O. Pavčević*
Some new Hadamard designs with 79 points admitting automorphisms of order 13 and 19 61

*T. Helleseth, C. Rong and K. Yang*
On $t$-designs from codes over $Z_4$ 67

*T. Kløve*
Relations between the covering and Newton radii of binary codes 81

*J. Lei, Q. Kang and Y. Chang*
The spectrum for large set of disjoint incomplete Latin squares 89

*T. Maruta*
The nonexistence of some quaternary linear codes of dimension 5 99

*A. Pasini*
Four-dimensional football, fullerenes and diagram geometry 115

*A.R. Prince*
Covering sets of spreads in PG(3,$q$) 131

*D. Wu and L. Zhu*
Bounds and constructions for TWOOAs 137

*S. Zhang and S. Li*
Some new extremal self-dual codes with lengths 42, 44, 52, and 58 147

*Y. Zhang, S. Pang and Y. Wang*
Orthogonal arrays obtained by generalized Hadamard product 151

*Z. Zhang, X. Ma and Y. Yang*
A unified method to construct neural network decoders for arbitrary codes and decoding rules 171

*L. Zhu and H. Zhang*
A few more *r*-orthogonal latin squares 183
